HOW MIGHT WE QUESTIONNAIRE

Student Learning Experience

- How might we make accessing learning materials seamless and available 24/7?
- How might we provide real-time doubt-solving support for students?
- How might we enhance the self-assessment process through structured mock tests?
- How might we personalize learning paths based on students' progress and weak areas?
- How might we ensure students stay motivated and engaged throughout their learning journey?

Performance Analysis & Improvement

- How might we provide students with comprehensive insights into their strengths and weaknesses?
- How might we use AI-driven analytics to suggest areas of improvement?
- How might we help students set and track their learning goals effectively?
- How might we gamify the learning process to encourage consistency?

Collaboration & Community Building

- How might we create a collaborative learning environment where students can discuss doubts?
- How might we enable peer-to-peer learning through discussion forums and study groups?
- How might we encourage mentorship opportunities between experienced learners and beginners?

Course Accessibility & Flexibility

- How might we offer flexible course structures that cater to different schedules?
- How might we ensure working professionals can complete skill-based courses efficiently?
- How might we provide female students with courses that accommodate their daily responsibilities?
- How might we integrate micro-learning to fit learning into busy schedules?

Technology & Personalization

- How might we leverage AI to recommend personalized courses based on career goals?
- How might we use predictive analytics to identify potential learning gaps early?
- How might we enhance the learning experience with interactive elements like AR/VR?
